## Author's Note

All praise is due to Allah. We praise Him and we seek for His assistance and forgiveness. We seek refuge with Him from the evils of our own souls and from our misdeeds. No one can mislead whomever Allah guides and no one can guide whomever Allah causes to go astray.

I testify that there is no deity worthy of worship except Allah. He is One and He has no partner. I also testify that Muhammad is His Slave and Messenger. Allah sent him with the religion of guidance so that it may prevail over all other religions even if the disbelievers dislike that.

Speaking about scientific miracles has become a necessity these days, as knowledge has made great and rapid strides that cannot be stopped even for a moment. Everyday there are new inventions and astounding discoveries. All this strengthens a Believer's faith and increases confusion in the confused person.

Allah has blessed me with collecting all the conclusions that have been arrived at by the leaders in this art of scientific and medical miracles. I, then, decided that this compilation should comprehensively include every topic relating to miracles either from the Qur'an or from the authentic Sunnah. Some repetitions may be found in this work due to some benefits such as considering the differences in the scholars'

methodologies of writing about one topic. The wisdom of this may be found in the popular saying: "You might find in a stream what you might not find in a sea."

Dear reader, on my part I have selected for you the most comprehensive, most authentic, most modern and most beautiful of these proofs. For the purpose of authentication, some of the specialists in these fields have shared their knowledge with me. I would mention, as an example, Dr. Muhammad Harb, a specialist obstetrician and gynecologist and Jihad 'Inayah and Mahir Kabab, who are both pharmacists. I am very grateful to them.

There is no doubt that this work that you are reading, as a first step on what the modern science has arrived at in our contemporary times, has already been mentioned in the Qur'an and mentioned by the Messenger of Allah, peace be upon him, more than 1,400 years ago. This is certainly not going to be the end either. There shall continue to be more and more discoveries that will show humanity that the Qur'an is truly Allah's Word. Allah says about the Qur'an:

﴿لَا يَأْتِيهِ الْبُطْلُ مِنْ بَيْنِ يَدَيْهِ وَلَا مِنْ خَلْفِهِ تَنْزِيلٌ مِنْ حَكِيمٍ حَمِيدٍ﴾

"Falsehood cannot come to it from before it or behind it; (it is) sent down by the All-Wise, Worthy of all praise (Allah, Glorified and Exalted be He)." (Soorah Fussilat 41:42)

He also says:

﴿وَمَا يَنْطِقُ عَنِ الْهَوَىٰ ۖ إِنْ هُوَ إِلَّا وَحْيٌ يُوحَىٰ﴾

"Nor does he speak of (his own) desire. It is only a Revelation revealed." (Soorah An-Najm 53:3-4)

This book includes two main topics. The main sections are:

1. Miracles in the sea
2. Miracles in animals

In short, these are the most important topics discussed in this work. I beseech Allah to make all that I have collected and written to make a reminder for those who have sound hearts, the ability to listen and

have presence of mind, and to make it purely for His sake and to benefit me and the Muslims as a whole with it. Indeed, He has power over all things and He is worthy of accepting prayers. All praise is due to Allah, the Lord of the worlds. May the blessings and peace of Allah be upon our leader Muhammad, his family and his Companions.

# Scientific Miracles in the Oceans

Modern images taken of the seas and oceans prove that the world's seas are not all the same in composition. Rather, they vary in temperature, salinity, density and oxygen content. In images taken by satellites each sea appears to be of a different color from the others. Some appear dark blue, some appear black and others appear yellow. This is due to the difference in temperature of each sea or ocean. In images taken from satellites using thermal imaging techniques, there also appears a thin white line separating one sea or ocean from another. This is what is called Barzakh (barrier).

Allah, the Exalted, says:

﴿مَرَجَ الْبَحْرَيْنِ يَلْتَقِيَانِ ﴿١٩﴾ بَيْنَهُمَا بَرْزَخٌ لَا يَتَّصِيَانِ﴾

"He has let loose the two seas (the salt and freshwater) meeting together. Between them is a barrier which none of them can transgress." (Soorah Al-Rahman, 55:19-20)

## Water and Life

When Allah, the Exalted, created the Earth and the heavens, and He wanted to create man on this Earth, He created for him water that is essential for man and other living creatures around him.

Allah, Most High, says:

﴿أَوَلَمْ يَرِ الَّذِينَ كَفَرُوا أَنَّ السَّمَوَاتِ وَالْأَرْضَ كَانَتْ رَاقًا  
فَفَنَقْنَاهُمَا وَجَعَلْنَاهُمَا مَاءً كُلٌّ مِّنْ حَمِيٍّ أَفَلَا يَتُوبُونَ﴾

"Have not those who disbelieve known that the heavens and the Earth were joined together as one united piece, then We parted them? And We have made from water every living thing. Will they not then believe?" (Soorah Al-Anbiya', 21:30)

Water is the substance of life, the magic elixir without which life on this planet would be impossible. Allah, the Almighty, mentions water in the Qur'an 33 times in the indefinite form (*Ma'un*), and 16 times in the definite form (*Al-Ma'*).

Allah reminds the Believers that He has sent down to them water which is essential for their lives, as He says:

﴿هُوَ الَّذِي أَنْزَلَ مِنَ السَّمَاءِ مَاءً لَّكُم مِّنْهُ شَرَابٌ وَمِنْهُ شَجَرٌ فِيهِ تُسِيمُونَ ﴿١٠﴾ يُنْبِتُ لَكُمْ بِهِ  
الزَّيْطَ وَالنَّخْلَ وَالزُّيْتُونَ وَالْأَعْنَابَ وَمِنْ كُلِّ الثَّمَرَاتِ إِنَّ فِي ذَلِكَ لَآيَةً لِّقَوْمٍ يَتَفَكَّرُونَ﴾

"He it is Who sends down water (rain) from the sky; from it you drink and from it (grows) the vegetation on which you send your cattle to pasture. With it He causes to grow for you the crops, the olives, the date palms, the grapes, and every kind of fruit. Verily, in this is indeed an evident proof and a manifest Sign for people who give thought." (Soorah Al-Nahl, 16:10-11)

## الإعجاز العلمي في البحار والحوانات

(باللغة الانجليزية)

Water is the substance of life, the magic elixir without which life on this planet would be impossible.

The Qur'an not only mentions that the creation of all living things began from water, it also talks about various phenomena related to water like the sending of rainfall, the layers of darkness and internal waves in the oceans, the different colours of the seas, cloud formation and the barrier between fresh water and saltwater.

Professor Schroeder one of the greatest oceanographers in West Germany used to say, "When science progresses, religion must inevitably retreat". But when he heard the translation of the meanings of the verses of the Qur'an he was stunned and said, "These cannot be the words of a human being."

Read on to find out about the astonishing scientific facts which came down to Arabs in the desert who did not know how to swim or sail in the seas and oceans or possess the sophisticated equipment to make such discoveries, discoveries that have left modern scientific researchers, oceanographers and experts speechless and in awe.
